Keep the "u" just add a legend where we can explain such things.

I didn't realize until now that you were asking me to get the remaining well data. I just forwarded to Joanna who may be able to complete the spreadsheet you sent.

The legend should have a scale and any other symbols or notes necessary to understand map.

How is the project coming along?

Subject: Dimock - Questions

Rupert,
Do you know what the status is for the well depth info. I was hoping to have it so I can include it in the map you requested.
Also, on the map...how do you want the parameters which received a non-detect displayed? Currently in Scribe the MDL is displayed in the result field with a "U" in the validator field. Which means that the parameter was not detected at the method detection limit. We can either keep that system going on the map (easiest and most-streamlined route, or we can change it to ND).
Thanks,

Suddha Graves
